Reconnecting Dunhuang - Theoretical Model (v3, corrected)

15 Entities · 16 Normalized Relations · 5 Narrative Layers

Together → Discovered → Dispersed → Institutionally Separated → Digitally Reconnected

I ORIGINAL CONTEXT

Historical and spatial context

- 9 **Silk Road** — Historical / Cultural Network
- R1 part_of_network
- 4 **Dunhuang** — Place
- R2 located_near
- 1 **DUNHUANG MANUSCRIPTS** — Documentary Collection
- R3 located_within
- 3 **Mogao Caves** — Place (Heritage Site)
- 2 **Library Cave (Cave 17)** — Place (Heritage Site)
- R4 sealed_in

II DISCOVERY

Rediscovery in 1900

- 5 **Wang Yuanlu** — Person
- R5 discovered
- 25 June 1900

III DISPERSAL

Early 20th-century dispersal

- 5 **Wang Yuanlu** — Person
- R6 sold_manuscripts_to
- 6 **Aurel Stein** — Person
- R7 sold_manuscripts_to
- 7 **Paul Pelliot** — Person
- R8 sold_manuscripts_to
- 8 **Ōtani Kōzui** — Person
- R13 facilitated_transfer_of
- 10 **Luo Zhenyu** — Person
- Scope: most remaining Chinese manuscripts; transfer to Beijing, 1910

IV COLLECTIONS

Institutional separation

- R9 held_by
- 11 **British Library** — Institution
- R10 held_by
- 12 **Bibliothèque nationale de France (BnF)** — Institution
- R11 held_by
- 13 **National Library of China** — Institution
- R12 held_by
- 14 **Tokyo National Museum** — Institution

V DIGITAL RECONNECTION

Contemporary virtual reunion

- R14 digitizes
- R15 provides_digital_access_to
- R16★ virtually_brings_together
- 15 **International Dunhuang Project (IDP)** — Digital Heritage Project

ENTITY TYPES

- Documentary Collection
- Person
- Place / Heritage Site
- Institution
- Historical / Cultural Network
- Digital Heritage Project

EVIDENCE

- Direct (Wikipedia starting page)
- Enriched (external authoritative source) ★

MODEL NOTE Entity types shown in this figure belong to the theoretical layer and are subsequently refactored into formal ontology classes in the Conceptual Model.
